

SNAKEBITE PREVENTION & TREATMENT SEMINAR

Terry Phillips—Manages the entire reptile collection and is the primary person dealing with the deadly snakes— "Terry is widely known for his work with venomous reptiles. He is also responsible for the rest of the reptile collection at Reptile Gardens, the seasonal Crocodilian and Snake shows, and year-round outreach programs."

Jim Bussell—Firefighter/Paramedic for 15 years and outdoor enthusiast— "My passion for the outdoors and... emergency medicine drove me to investigate acute (pit viper) envenomation."

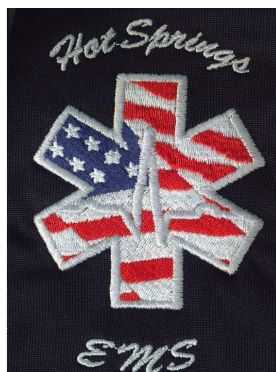

Darby Kane—anti-venom manufacturer and educator— "I helped develop the three apps we use, Snakebite911 ER/FR, and I work with our partners in Poison Control Centers to urge healthcare providers to consult poison control centers for poisonings and envenomation. I've been providing snakebite education in the Black Hills for 4 years."

Tim Ripley, RN—ER/Trauma Coordinator at Fall River Health Services— "I have been an ER/Trauma nurse since 1985. In the 90's, I did Snakebite Seminars with Bill Haas and the Miami Serpentarium. I have cared for many venomous snakebites ranging from the Eastern Diamond Back, Coral, Cobra, and Prairie Rattler."
